Karaikudi

To

The principal  
Sri RaajaRaajan College of Engineering & Technology  
AmaravathiPudur.  
Karaikudi

Respected Sir /Madam

I hope this letter finds you in good health and high spirits. I am writing on behalf of the Agricultural Engineering Department at **Sri RaajaRaajan College of Engineering & Technology** a reputable educational institution in **Karaikudi**, to request permission for an industrial visit to enhance the learning experience of our Agricultural Engineering students. This visit aims to expose our students to real-world applications of their field of study, fostering a deeper understating of agricultural engineering principles and practices.

Details of the proposed Agricultural Engineering student industrial visit are as follows:

Date: 21.10.2024 to 23.10.2024

State: Kerala

- Eravikulam National Park
- Tea Museum
- Vagamon Meadows
- Kurishumala Dairy farm
- Vagamon

  
**PRINCIPAL**

Sri Raaja Raajan College of Engg. & Tech.  
Amaravathipudur, Karaikudi - 630 301  
Sivagangai Dist. Tamil Nadu

Trust Office : Sri Raaja Rajan School Campus, No.72, College Road, Karaikudi – 630 001.  
Ph : 04565 – 234430, Mobile : 73737 11343, 73737 11338, 73737 11339, 73737 11322, 73737 11333

During this visit, our Agricultural engineering students will have the opportunity to:

- Gain practical insights into the design and operation of agricultural machinery and equipment.
- Interact with experienced agricultural engineers and professionals to learn about the latest technologies and innovations in the field
- Witness the development and maintenance of agricultural infrastructure and systems.
- Apply theoretical knowledge to practical scenarios, reinforcing their classroom learning.
- Explore potential career paths and opportunities within the field of Agricultural Engineering.

We want to assure you that the safety and well -being of our students are of utmost importance. Faculty members from the Agricultural Engineering department will accompany the students during the visit, and we will strictly adhere to all safety guidelines provided by the hosting facility or company.

We understand the need to minimize disruption to the regular college schedule and have carefully selected a date and time that will have minimal impact on classroom activities.

We kindly request your approval for this agricultural Engineering student industrial visit,as it directly aligns with the educational objectives of our department.This practical exposure will significantly benefit our students,preparing them for successful careers in Agricultural Engineering.

We are committed to making all necessary preparations to ensure the visit proceeds smoothly and safely,Your support and consent for this industrial visit are highly valued,and we look forward to your positive response.

Thank you for considering our request,and we anticipate the valuable learning experiences this visit will provide to our Agricultural Engineering students.

Date:17-10-24

Place:karaikudi

# INTRODUCTION

Kerala is a popular hill station resort in India filled with abundant beauty as well as its massive tea plantations and estate gardens. Kerala is known as the tea farming destination offering an amazing opportunity for people to visit the place where tea is actually processed, packed and sold to all and all this happens within a Tea Factory in Kerala . Kerala is also known for its oil extraction industry obtained from the natural oils of the eucalyptus trees, clove, lemon grass, camphor and geranium used in different herbal massage treatments.

Like most tea factories across the world, the MASCO Tea Factory in Kerala is also equipped to produce tea of different qualities. It also aims at exporting to large international markets and hence the entire tea manufacturing process is well planned and highly optimized and grounded up to churn out exceptionally good edible quality of tea that tastes good and fresh and is then only retailed in numerous market places in India and Abroad.

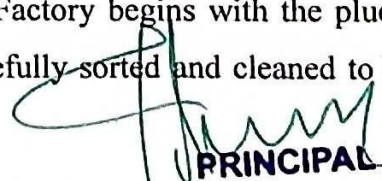

The cultivation and brewing of tea in India has a long history of applications in traditional systems of medicine and for consumption. Research shows that tea is indigenous to eastern and northern India, and was cultivated and consumed there for thousands of years. However, commercial production of tea in India had not begun until the arrival of the British East India Company, at which point large tracts of land were converted for mass tea production.

In the early 1820s, the British East India Company began large-scale production of tea in Assam, India, of a tea variety, traditionally brewed by the Singpho tribe. In 1826, the British East India Company took over the region from the Ahom kings through the Yandaboo Treaty.

The Masco Tea Factory is committed to maintaining high standards of hygiene and safety in its production processes. The factory adheres to strict quality control measures to ensure that only the best tea reaches the consumers.

The factory is spread across a sprawling area and is equipped with state-of-the-art machinery and equipment for tea processing. The tea leaves are sourced from the lush green tea gardens that surround the factory, ensuring the freshness and quality of the final product. Malanad co-operative tea factory (MASCO) is located in the picturesque town of Vagamon in the Idukki district of Kerala, India. The process of tea production at the Vagamon Tea Factory begins with the plucking of the finest tea leaves from the gardens. The leaves are then carefully sorted and cleaned to remove any

  
**PRINCIPAL**  
Sri Raaja Raajan College of Engg. & Tech;  
Amaravathipudur, Karaikudi - 630 301  
Sivagangai Dist. Tamil Nadu

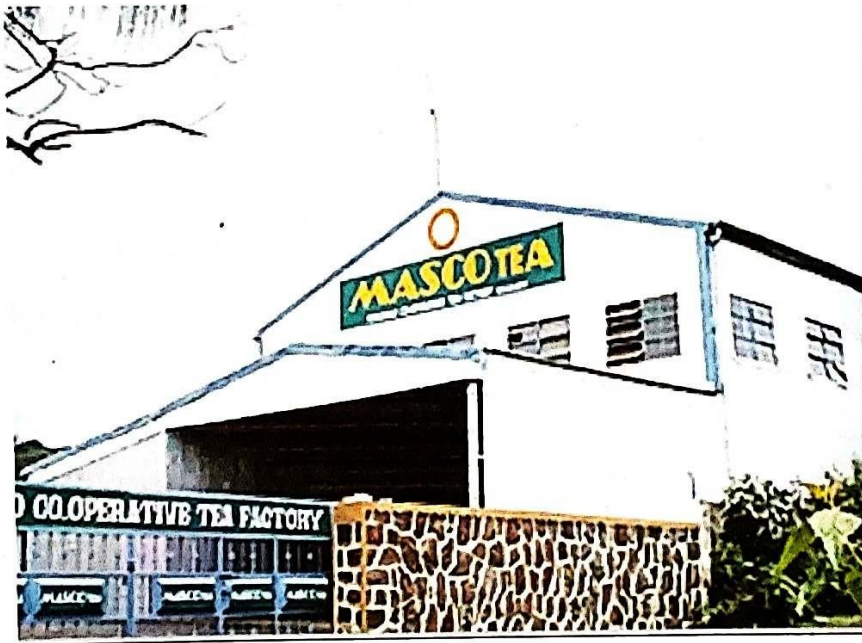

impurities. After this, the leaves undergo various stages of processing, including withering, rolling, oxidizing, and drying, all of which are carefully monitored to ensure the best flavor and aroma.

Once the tea leaves are fully processed, they are packed in high-quality packaging materials, ready to be distributed to various markets and retailers across the country and overseas.

Additionally, the factory is also focused on sustainable and eco-friendly practices, ensuring that the tea production processes have minimal impact on the environment.

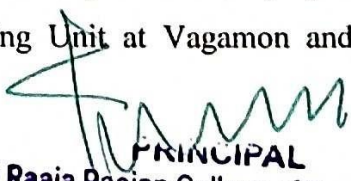

Overall, the MASCO Tea Factory stands as a symbol of excellence in the tea manufacturing industry, producing high-quality tea that is cherished by tea lovers worldwide. Its dedication to quality, sustainability, and innovation has made it a trusted name in the tea industry.

## MASCO TEA FACTORY

MASCO Tea - an Organic Tea manufactured from the beautiful landscape of Vagamon , a small Picturesque town in the mountains of Kerala in South India. The MALANAD SERVICE CO-OPERATIVE BANK LTD, which was established in 1970 under took a prestige project, a Tea Processing Unit- with an aim to save the poor member farmers to get an adequate price for the green tea leaves. In 1995, they started to produce tea leaves. But, there were several hurdles waiting for them and after facing severe setbacks, the bank authorities decided to set up a tea factory by itself. On 02.11.2000, the society started the new venture, Tea Processing Unit at Vagamon and for thousands of farmers, this was a ray of hope and a dream come true.

## DETAILS OF THE JOURNEY

The complete report based on an industrial visit organized by B.Tech Agricultural Engineering students Sri Raaja Raajan college of engineering and Technology, in order to increase their knowledge.

### OVERVIEW OF THE TRIP:

- ❖ Department of B.Tech Agricultural Engineering Sri Raaja Raajan college of engineering and Technology had organized an industrial visit on 23 October 2024 to “ Malanad Co-operative tea factory (MASCO)” vagamon P.O, Idukki Dist, Kerala
- ❖ The visit was organized with prior permission and guidance of Dr.V. sarathi
- ❖ Mr.Hariharan & Ms.Pooja ,are the Co-Ordinators for this whole industrial visit.

### DETAILS OF OUR JOURNEY

- We started travelling from the college campus at 8.30 pm via travels bus on 21 October 2024 along with co-ordinators faculties.
- We reached Munnar on 22 October 2024 by 8.30 am and refresh in our allowed courters
- Then we visit tea estate in Munnar where students learn about growing of tea plants and harvesting of tea leaves for processing
- On next day we visited MASCO tea factory, vagamon and learnt the mechanism of tea processing

  
PRINCIPAL  
Sri Raaja Raajan College of Engg. & Tech.  
Amaravathipudur, Karaikudi - 630 301  
Sivagangai Dist. Tamil Nadu

## OBJECTIVES OF THE VISIT

- ❖ To familiarize with the organizational structure and it's functioning.
- ❖ To familiarize with the different department in the organization and their functions and activities including documentation.
- ❖ To understanding hoe to the key business proceses are carried out in organization.
- ❖ To increase knowledge and information about the technologies and methods used to produce tea products
- ❖ To study overall performance of the organization
- ❖ To know about the tea industry and tea products
- ❖ To get information about the working of machineries in the company
- ❖ To understand the current market strategies
- ❖ To know the demand and pricing strategies that are used
- ❖ To know the grade of tea leaves used to manufacturing process.

# INDUSTRIAL PROFILE

## TEA INDUSTRY:

The global tea market has witnessed a strong and steady growth in the tea production and tea consumption from around the world over the recent decades, while the top tea producing countries are still dominating the global market with their significant tea productions year on year. globally tea is grown in more than 48 countries. However, only top seven countries including India contributed 90% of the total world tea production.

Indian Tea Industry is about 172 years old. The industry occupies an important place and plays a very useful part in the national economy. In 1823 Robert Bruce Invented tea plants growing wild in upper Brahmaputra Valley.

The first Indian tea from Assam was sent to United Kingdom for Public Sale. Then later in it extended to other parts of country between 50's and 60's of last century. Tea plantations are mainly located in rural hills and backward areas of Northern, Eastern, Southern States. The Major tea growing areas in India are concentrated in Assam, West Bengal, Tamilnadu and Kerala. The other areas growing tea to the extent is Karnataka, Tripura, Himachal Pradesh, Uttranchal, Arunachal Pradesh, Manipur, Sikkim, Nagaland, Meghalaya, Mizoram and Bihar. In India Tea is indigenous and is an area where the country can take a lot of pride. It is mainly due to it's pre-eminence as a foreign exchange earner and it's contributions to the country's GNP. India has emerged as world leader in all aspects of tea production, consumption and export mainly because it accounts for 31% of global production.

For last 150 years perhaps the Tea Industry is the only one where India has retained it's leadership over. The range of tea offered by India -from the original Orthodox to CTC and Green Tea, from the aroma and flavour of Darjeeling Tea to the strong Assam and Nilgiri Tea-remains unparalleled in the world.

## WHAT WE LEARN

We learn more details about the tea processing and marketing in MASCO Tea factory which located at vagamon,kerala. Students got more data and also they enjoyed their industrial visit.Students understand present market situation, pricing strategies and production details of products in there.Visitors can see the entire processing method right from the freshly plucked green leaves to its packing. At tea factory, they have made the arrangements for visitors to see the process of manufacturing of Tea.Factory staffs are very co-operative. They are responding each and every questions of visitors about the manufacturing process. They have shown each and every step in the manufacturing of Tea.They also provide a free cup of tea to every visitors.They have made the arrangement for purchasing the variety of Tea.Providing a free cup of tea is a very good marketing technique.The visitors who enjoy the taste of tea at free cost will eager to purchase the product.

## PRODUCT PROFILE

- Masco Hotel Blend Strong
- Masco Hotel Blend
- Masco Home Taste
- Masco Broke Orange Peccoa
- Masco Premium

## OBSERVATION AND SUGGESTION

1. Visit all their production areas and collect more data and also purchase their products.
2. Allowing students pass and providing facilities for academic seminars
3. They can provide a brief text or notes contain details about them.
4. One of the guide at the factory helped us in explaining the working process of the machine.
5. Explained the products details in the factory clearly..They can provide a brief text or notes that contain the details about the factory and the process of making.
6. They can provide a brief text or notes that contain the details about the factory and the process of making.
